MEET OUR TEAM

INTERWOVEN

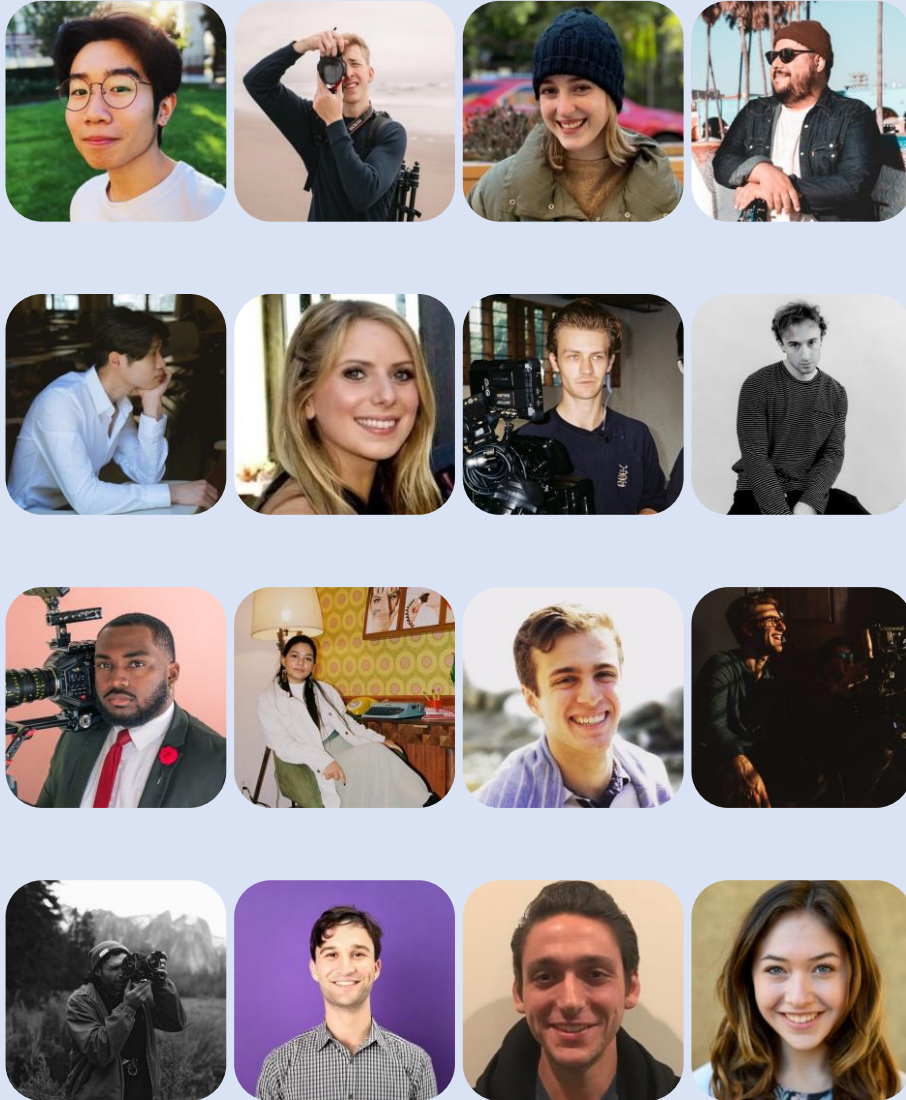

A Full-Spectrum Creative Roster for Every Situation. We Are Your Team's Production Team.

INTERWOVEN PRODUCTIONS is a boutique creative production agency based in Los Angeles. We facilitate turn-key production solutions on behalf of clients within the branded, commercial, social and film/tv spaces.

Anchored out of our LA studio, we've fostered a creative community that has blossomed to represent a wide range of content experts and production specialists – from directors, to photographers, DPs, editors, animators and more.

We make this 'interwoven' community available to you and your brand, while providing white-glove producer support services to move projects through from pre-production to final cut.

THE CREATIVE ROSTER

LEARN OUR PROCESS

INTERWOVEN

(1) LEARN

Our Producer Team meets you and learns about your project. We begin to understand the type of support your creative production needs.

(2) CONNECT

We connect your project with our Creative Community and form your team. We begin creative direction and pre-production work.

(3) CREATE

We create and develop your content plan, bringing your project to life. We execute production on-time, on-brand and on-budget.

(4) SHARE

Final assets are shared in ready, postable format for social, email newsletters, e-comm and more! We reset for the next project :)

Streamlined Content Operations.

Designed to Embed With Your Team's Day-to-Day.

Our team approaches each project from a blank-slate perspective, developing one-of-one solutions that can be streamlined to easily embed with your team's content operations and media planning.

Each project begins with an intro call with our Producer Team where we learn about goals for your content production project.

From there, we connect your project with our creative community and begin important creative direction and pre-production activities, like mood boards and script writing, casting, equipment rentals and location scouting.

Once the project is all-set for production, we move into content capture and creation before developing final assets to share with your team!
